While fighting to provide in-person school amid a pandemic dominated the 2020-2021 school year, it was far from the only project on our “to-do” list. A relatively small committee comprised of the Board members from the Co-Curricular Committee and Building, Grounds, and Transportation Committee and the administration began the task of working with the district’s architects, Wold Architects and Engineers, on a “Gymnasium Concept Study.” The committee’s work resulted in the development of a schematic design for a multi-court gymnasium along with improvements to the school’s south drive and parking areas.

The Seneca High School Board of Education is eager to share the schematic design with the community for feedback and input. To that end, SHS is inviting members of the community to learn about the potential project, ask questions, and provide opinions. On Wednesday, June 9, Seneca High School will hold public forums at 10:30 AM and 5:30 PM in the school’s Auditorium.
